

Managed Security

Security Operations as a Service (SOCaaS)

There is a direct correlation between cybersecurity effectiveness and the resources and tools applied. A fully staffed SOC is resource-consuming; managed security services are a cost-effective alternative—extending your team with skills focused on core processes.

Our SOCaaS offers 24x7 monitoring, alert enrichment, incident prioritization, and playbook-led responses for your critical security tools. We focus on reducing your risks, speeding your threat response, and unburdening your team.

Our team provides your organization with hand-curated, validated threat intelligence feeds, technical knowledge of best-of-breed technologies, and experienced threat hunters without increasing your internal investment. Our testing and incident response teams are integrated to help drive continuous improvement and apply strategic guidance.

Managed Cloud Security

Cloud-hosted data, applications, and users require a different security approach. Leverage the benefits and minimize cloud risks with our experienced practitioners.

- Cloud Access Security Broker
- Cloud Proxy
- Multifactor Authentication
- Public Cloud:
AWS, Azure & Google Cloud

Managed Data Protection

Sourcing and retaining data protection skills and hands-on experience can be difficult. Our critical knowledge of core technologies and best practices helps you protect your data from loss, corruption, and theft.

- Data Loss Prevention
- IBM Guardium

Managed Detection & Response

Operationalizing data from disparate security tools is challenging. We expertly manage your key security controls to investigate alerts and facilitate remediation.

- Email Security
- Endpoint Detection & Response
- Incident Remediation
- Next-Generation Firewall
- Platform Management
- Security Event Remediation
- Security Information & Event Management

BENEFITS

Accelerate Response to Threat Intelligence & Incidents

Gain SOC Coverage Without SOC Costs

Access Key Technology Expertise

Apply Continuous Improvements to Security Posture

Managed Threat & Vulnerability Management

Threats can bypass security controls and overwhelmed teams can miss critical alerts. We conduct in-depth investigations to understand and prioritize your organization's vulnerabilities, mitigate your threats, and identify malicious activities that evade detection.

Scanning	Threat Intelligence/ Dark Web Monitoring
Threat Hunting	Threat Modeling

Security as a Service (SECaaS)

Simplify your cybersecurity with the flexibility to shift services as your priorities change. Converge's SECaaS uses a single, discounted scope of work to help you manage your shifting needs and budget.

Application Security	Network & Infrastructure Security
Cloud Security	Security Awareness & Education
Email Security	Vulnerability Management & Penetration Testing
Governance, Risk & Compliance	
Incident Response & Threat Intelligence	

Relentlessly Focused on Cybersecurity

When you partner with Converge Cybersecurity, you can expect your priorities to be ours. Our team of strategists, former CISOs, and security experts provide unbiased expertise to help you build, manage, and optimize cybersecurity across your enterprise.

From technology solutions to advisory services, we bring our decades on the front lines of cybersecurity to help you safeguard your organization in a shifting landscape of risks, vulnerabilities, and regulations. We listen first, apply our expertise to address your challenges, and ensure that the technologies we deliver meet your current and future needs.

Converge Technology Solutions is a services-led, software-enabled, IT & cloud solutions provider focused on delivering industry leading solutions and services.
